

Launch of the book *Agrorrural – Contributos Científicos*

Today at the Quinta do Marquês, in Oeiras, a ceremony was held to launch the book *Agrorrural – Contributos Científicos*, (Rural Agriculture - Scientific Contributions), a work that is co-published by the INCM and the National Institute of Biological Resources.

The event forms part of celebrations of the 75th anniversary of the creation of the National Agricultural Station. Present were the Secretary of State for Forests and Rural Development, Daniel Campelo and, representing the INCM, the Chairman of the Board of Directors Estêvão de Moura and the board member Renato Leitão.

The event of choice to celebrate the anniversary of an institution that has always been dedicated to research was the publication of a scientific text that provides a window into the work that it has been carrying out over the years. The book bears witness to the best work that has been done in different areas of science at the National Agrarian Research Institute (INIA) which has accommodated the ex-National Agricultural Station since 1974.
